ReadMe First!
The enclosed documents will not operate unless minimum hardware and system software standards are met and certain programs are installed on the host computer (see below). It is likely that the vast majority of potential users of this CD-ROM do meet these requirements and already have the necessary programs installed.

Minimum Requirements for Windows Computers:
- IBM PC or compatible, with Pentium processor.
- Windows 95 or higher.
- 32MB or more RAM.
- 2X or faster CD-ROM drive.
- VGA or higher monitor.
- Adobe Acrobat 3 or higher.*

Minimum Requirements for Macintosh Computers:
- Power PC computer.
- System 7.5 or higher.
- 32MB or more RAM.
- 2X or faster CD-ROM drive.
- Adobe Acrobat 3 or higher.*
- Web browser, such as Internet Explorer or Netscape.*

* Free Software:
The starred (*) items above are freely distributable programs that are provided on this CD-ROM for the convenience of users who may not already have all of the necessary programs. Please note that each of these programs must be individually installed onto the host computer from the CD-ROM in order for them to be useable. Note also that while all of these programs are freely distributable, each has its own licensing requirements with which the user must comply. Also, while each of these programs has been downloaded directly from the respective manufacturers and has been checked for viruses, neither the Volpe Center nor the U.S. Department of Transportation nor any of their consigns are responsible for any problems that may occur as a result of installing any of these programs. Technical support for these programs is available from the respective manufacturers, whose contact information is included in the installation software.

Accessibility (Section 508 compliance):
We are committed to making our communications materials accessible to all. We have taken several measures to insure that the enclosed documents and presentations meet the requirements of Section 508 of the Rehabilitation Act, and where some may not, clearly designated alternative versions have been included that are specifically designed for 508 compliance. We would appreciate feedback from anyone who finds access to any of these materials to be impeded in any way, or who has suggestions for improving accessibility.
